KURSUSBEVIS

Taisiia Pleskachova

- født d. 31/07-1991 -
har gennemført e-lærings kurset

Hygiejnekursus

Kursisten har opnået:

- kendskab til zoonotiske bakterier og virus med udgangspunkt i husdyr-MRSA
- kendskab til resistensudvikling hos bakterier
- kendskab til menneskers naturlige immunforsvar
- viden om metoder til at minimere forekomsten af zoonoser i stalden
- viden til at kunne identificere en smitterisiko, og vælge en korrekt metode til at forebygge smittespredning
- viden om betydning af at være MRSA-bærer
- kendskab til rettighederne som MRSA-bærer i sundhedsvæsenet.

Kursisten har fået

100 % rigtige
i kursets afsluttende test

Kurset er gennemført:
2018-04-29

Recommendation for Taisiia Pleskachova	Pedersen Multisite, Osted midtsjælland. 1150 sows, 7kg production
-----------------------------------------------	----------------------------------------------------------------------

Taisiia started with us in 2014 and was from the start in the farrowing department. She was quick to learn the procedure and immediately became part of the team. During the 1 year she was there, she also helped In the department of insemination and pregnant sows.

Taisiia is a quiet and calm girl. She is ready to work extra if help is needed on weekends or holidays. There were no episodes where she and her colleagues were unfamiliar.

When she started she was completely without experience with pigs, but during her time with us she has learned everything about: farrowing help, treatment of sows and piglets, sorting and making newborn teams, adjustment of feed curves, edge cutting, etc. But also insemination, vaccination, straw division, high pressure wash, etc. Almost all tasks have to do with the direct care on the floor.

Taisiia manages her time well and is almost always finished with all her tasks in the right time. She is incredibly stable and has only had very few sick days. Her English was at the beginner's level when she started, but she improved it considerably during her time.

As an agricultural assistant for fitting lates I would like to recommend Taisiia Pleskachova

If there is a need for further elaboration of her abilities or character,
you are welcome to contact me on tel: +45 31 67 08 73

This recommendation is written by:

Morten Jensen. Farm manager of Danfarm in Ukraine. Former manager of: Pedersen Multisite	Morten Jensen. -----

Recommendation

Taisiia Pleskachova
CPR No 310791-4772

Taisiia Pleskachova has been employed as a student at the 6/07/ 2015 to 1/12/2016

Protekta Farm A / S 1300 sows produces over 40,000 fattening pigs per year.

Taisiia is a calm girl. She is ready to work extra if there is a need for help during the weekend or holidays. There were no episodes of disqualification between her and colleagues.

During her time with us she has learned everything about: Childbirth, treatment of sows and piglets, sorting and calving, adjustment of feed curves, edge trimming, etc. And also insemination, vaccination.

Taisia manage her time well. She is incredibly stable and has only had few sick days.

When her student contract was over, we decided to continue our cooperation, and made her the head of a grown-up department, where she worked in a team with two students, passed on her knowledge, planned and controlled the work of the department, discussed problems and proposals with the veterinarian.

During the period Taisiia has been employed, we have had good production results. There have also been problems of illness that she has been vigorously helped to solve.

If there is a need for additional information, please contact me by phone:
